

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Note.—The method of classification by countries of destination prepared from statements furnished by Municipal Authorities gives an inadequate idea of the number of Italian emigrants. A large number of persons who start as temporary emigrants to neighbouring countries (France, for example), not finding employment, leave again and go elsewhere, for the most part to America. On the other hand, the statistics of *temporary* emigrants which are prepared by Municipal Authorities on the basis of the passports granted, do not include a certain number of persons who go to European countries without any passports.

A more exact idea of the current of emigration to countries outside Europe can be obtained from the statistics published by certain of the countries colonised. The following Table shows the Italian immigration into the United States, Argentina, Uruguay and Brazil for the years 1896-1903.

† Exclusive of the Lake trade between the United States and Canada.

‡ The basis of the returns of Shipping engaged in the Foreign Trade was extended in 1897 and now includes vessels (liners) engaged in the coasting trade of Italy which extend their voyages to neighbouring foreign ports. Foreign vessels belonging to Shipping Companies (*Linee di navigazione a vapore*) which touch at Italian Ports have been also since 1897 included in the foreign trade shipping returns.

§ Includes the "grand cabotage," i.e. the traffic between Portugal and the Azores and Madeira, which is restricted to Portuguese vessels.

NOTE.—The above statement represents the business of the Western Union Telegraph Company only. This Company owns a large part of the whole of the United States Telegraph system.

The aggregate mileage of the telegraph lines in the United States open for public business exceeds 270,000 miles, besides railway, Government, private, and telephonic lines, the length of which is not ascertainable.

* Excluding messages (probably 10,000,000) sent over leased wires or under railroad contracts.

* Debt of various Ministries.

† To the annual charge of interest of the Austrian General Debt, Hungary contributes a fixed yearly sum (90,681,000 Kronen = £2,598,000).

‡ The increase in the Consolidated Debt, and the decrease in the Annuities, is due to the conversion of various redeemable Annuities into 4 per cent. perpetual Hungarian Stock. For further details see notes (v) and (i) pp. 300-1.

* The expression used in the original is "Guldmalin," or gold-bearing ore. The amount of pure gold extracted from the above ores was, in 1891, 109 kilograms; in 1892, 87 kilograms; in 1893, 92 kilograms; in 1894, 93 kilograms; in 1895, 85 kilograms; in 1896, 114 kilograms; in 1897, 113 kilograms; in 1898, 125 kilograms; in 1899, 106 kilograms; in 1900, 85 kilograms; in 1901, 62 kilograms; in 1902, 94 kilograms; and in 1903 50 kilograms.

† These figures include gold-bearing copper ore to the following extent. In 1899, 1,877 tons; in 1900, 1,054 tons; in 1901, 988 tons; in 1902, 1,353 tons; in 1903, 1,467 tons.

NOTE.—The equivalents are not in all cases the exact equivalents of the exchange of the day but rates which are convenient for comparisons over long periods. This applies especially to those countries with inconvertible paper currencies. In such countries the nominal "face" value of the paper (which as a rule is that used in making conversions in this Abstract) is often very greatly in excess of its current exchange value.

‡ The Peso—the principal coin in circulation before the acquisition of the island by the United States—is redeemable at 80 cents (U.S. coinage).

Note.—The method of classification by countries of destination prepared from statements furnished by Municipal Authorities gives an inadequate idea of the number of Italian emigrants. A large number of persons who start as temporary emigrants to neighbouring countries (France, for example), not finding employment, leave again and go elsewhere, for the most part to America. On the other hand, the statistics of temporary emigrants which are prepared by Municipal Authorities on the basis of the passports granted, do not include a certain number of persons who go to European countries without any passports.

A more exact idea of the current of emigration to countries outside Europe can be obtained from the statistics published by certain of the countries colonised. The following Table shows the Italian immigration into the United States, Argentina, Uruguay and Brazil for the years 1896-1904.

‡ The basis of the returns of Shipping engaged in the Foreign Trade was extended in 1897 and now includes vessels (Linea) engaged in the coasting trade of Italy which extend their voyages to neighbouring foreign ports. Foreign vessels belonging to Shipping Companies (*lines di navigazione a vapore*) which touch at Italian Ports have been also since 1897 included in the foreign trade Shipping returns.

* Includes the "grand cabotage," i.e. the traffic between Portugal and the Azores and Madeira, which is restricted to Portuguese vessels.

* Prior to 1900 the tonnage of Japanese vessels is that of vessels of European type only. In 1900 the Japanese navigation returns were revised and the particulars now include an insignificant number of Japanese junks engaged in the foreign trade. Besides the direct trade, the returns now include the carrying trade between the open ports. The figures for 1904 are abnormal owing to the war.

1907.

[Cd. 3291.]

NOTE.

The Tables in this Abstract are in practically the same form as in previous issues, except that the Table showing the imports and exports of the United States classified according to the Categories of Food Stuffs, Raw Materials, Manufactures, &c., has been revised in accordance with the new classification recently adopted by the United States Bureau of Statistics.

A similar Table summarising the Foreign Trade of Spain has been inserted on page 78.

Tables have also been added on pages 146-7 and 222-3 dealing with the import and export trade of Servia.

Throughout the present number the German Mark has been taken as equivalent to 11·8*d.*, instead of 1*s.* as in previous numbers, in order to show more accurately the value of the foreign trade, etc., of Germany. This should be borne in mind when making comparisons over long periods.

NOTE.—The equivalents are not in all cases the exact equivalents of the exchange of the day, but rates which are convenient for comparisons over long periods. This applies especially to those countries with inconvertible paper currencies. In such countries the nominal "face" value of the paper (which as a rule is that used in making conversions in this Abstract) is often very greatly in excess of its current exchange value.

* See also note, page 180.

† See also note, page 184.

‡ The Peso—the principal coin in circulation before the acquisition of the island by the United States—is redeemable at 80 cents (U.S. coinage).

Note.—The method of classification by countries of destination prepared from statements furnished by Municipal Authorities gives an inadequate idea of the number of Italian emigrants. A large number of persons who start as temporary emigrants to neighbouring countries (France, for example), not finding employment, leave again and go elsewhere, for the most part to America. On the other hand, the statistics of temporary emigrants which are prepared by Municipal Authorities on the basis of the passports granted, do not include a certain number of persons who go to European countries without any passports.

A more exact idea of the current of emigration to countries outside Europe can be obtained from the statistics published by certain of the countries colonised. The following Table shows the Italian immigration into the United States, Argentina, Uruguay and Brazil for the years 1896–1903.

‡ The basis of the returns of Shipping engaged in the Foreign Trade was modified in 1897 and again in 1905. Vessels belonging to Foreign Shipping Companies (*lines di navigazione a vapore*) which touch at Italian Ports have been since the beginning of 1897 included in the shipping returns. From 1897 to 1904 inclusive, the whole movement of Italian steam vessels (liners) engaged in the coasting trade of Italy which extended their voyages to neighbouring foreign ports were also included. Since the beginning of 1905 the coasting part of the voyages of these latter vessels has been recorded separately and excluded from the returns of foreign-going shipping accordingly.

* Prior to 1900 the tonnage of Japanese vessels is that of vessels of European type only. In 1900 the Japanese navigation returns were revised and the particulars now include an insignificant number of Japanese junks engaged in the foreign trade. Besides the direct trade, the returns now include the carrying trade between the open ports. The figures for 1904 are abnormal owing to the war.

† Vessels of Foreign type only. § In and after 1899 the figures include the tonnage of Vessels (engaged in the Foreign trade) calling at several ports in the course of the same voyage, the tonnage of such vessels being taken account of at each port of call.

‡ Revised figures.

¶ Owing to changes in the method of recording the shipping statistics of Uruguay, the figures for 1902 and subsequent years are not comparable with those for the earlier years shown.
